

Dr. Emily Deibert

Banting Postdoctoral Fellow
Waterloo Centre for Astrophysics
University of Waterloo

Email: emily.deibert@uwaterloo.ca
Web: emilydeibert.github.io

Academic Positions

Banting Postdoctoral Fellow University of Waterloo	2026 – 2029
Postdoctoral Science Fellow Gemini South Observatory/NSF NOIRLab	2022 – 2026
NSERC Postdoctoral Fellow NSERC & Gemini South Observatory/NSF NOIRLab	2022 – 2024

Education

University of Toronto PhD in Astronomy & Astrophysics Advisors: Prof. Suresh Sivanandam, Prof. Ray Jayawardhana	2017 – 2022
University of Toronto, Victoria College HBSoc. in Astrophysics, English, and Mathematics (<i>High Distinction</i>) Advisor: Prof. Chris Matzner	2012 – 2017

Refereed Publications

First/Second Author & Student-Led Papers

** indicates student-led paper for which I was the primary supervisor*

1. Bell*, **Deibert**, Langeveld, et al., “High-Resolution Dayside Spectroscopy of the Ultra-Hot Jupiter WASP-178b with GHOST/Gemini South”, 2026, [accepted by AJ](#).
2. Langeveld, **Deibert**, Young, et al., “A time-resolved high-resolution spectroscopic analysis of ionized calcium and dynamical processes in the ultra-hot Jupiter HAT-P-70 b”, 2025, [ApJL](#), **981**, 32.
3. **Deibert**, Langeveld, Young, et al., “High-resolution Dayside Spectroscopy of WASP-189b: Detection of Iron during the GHOST/Gemini South System Verification Run”, 2024, [AJ](#), **168**, 148.
4. **Deibert**, de Mooij, Jayawardhana, et al., “ExoGemS High-Resolution Transmission Spectroscopy of WASP-76b with GRACES”, 2023, [AJ](#), **166**, 141.
5. **Deibert**, de Mooij, Jayawardhana, et al., “Detection of Ionized Calcium in the Atmosphere of the Ultra-Hot Jupiter WASP-76b”, 2021, [ApJL](#), **919**, L15.
6. **Deibert**, de Mooij, Jayawardhana, et al., “A Near-Infrared Chemical Inventory of the Atmosphere of 55 Cancri e”, 2021, [AJ](#), **161**, 209.
7. **Deibert**, de Mooij, Jayawardhana, et al., “High-resolution Transit Spectroscopy of Warm Saturns”, 2019, [AJ](#), **157**, 58.

Contributing Author

8. Larsen et al. incl. **Deibert**, “TESS Photometry and Radial Velocity Analysis of the sub-Neptune Exoplanet π Mensae c and the Wider π Mensae Planetary System”, 2026, [accepted by AJ](#).
9. Pelletier et al. incl. **Deibert**, “The breaking of cold traps and onset of titanium in ultra-hot Jupiter atmospheres: WASP-189b in context”, 2026, [A&A](#), **711**, 119.

10. Kanumalla et al. incl. **Deibert**, “The Roasting Marshmallows Program with IGRINS on Gemini South V: Atmosphere of MASCARA-1 b is Enriched in Refractory Elements”, 2026, [AJ](#), **172**, 83.
11. Jeong et al. incl. **Deibert**, “The Actinide-Boost Star LAMOST J122216.85-063345.2: A Detailed R-process Abundance Study with Gemini-S/GHOST”, 2026, [ApJ](#), **1005**, 92.
12. Weisserman et al. incl. **Deibert**, “Aligned Stellar Obliquities for Two Hot Jupiter-hosting M Dwarfs Revealed by MAROON-X: Implications for Hot Jupiter Formation”, 2025, [AJ](#), **170**, 313.
13. Meziani, Flagg, Turner, **Deibert**, et al., “The Effect of Offsets from True Orbital Parameters on Exoplanet High-Resolution Transmission Spectra”, 2025, [AJ](#), **170**, 290.
14. Rodriguez et al. incl. **Deibert**, “The Secondary Component of the Extreme Low Mass Ratio Massive Binary HD 165246 revealed by GHOST”, 2025, [ApJ](#), **980**, 169.
15. Kalari et al. incl. **Deibert**, “Gemini High-resolution Optical SpecTrograph (GHOST) at Gemini-South: Instrument performance and integration, first science, and next steps”, 2024, [AJ](#), **168**, 208.
16. Dovgal et al. incl. **Deibert**, “Probing the early Milky Way with GHOST spectra of an extremely metal-poor star in the Galactic disk”, 2023, [MNRAS](#), **527**, 7810.
17. Placco et al. incl. **Deibert**, “SPLUS J142445.34-254247.1: An r-process-enhanced, Actinide-boost, Extremely Metal-poor Star Observed with GHOST”, 2023, [ApJ](#), **959**, 60.
18. Flagg, Turner, **Deibert**, et al. “ExoGems Detection of a Metal Hydride in an Exoplanet Atmosphere at High Spectral Resolution”, 2023, [ApJL](#), **953**, 19.
19. Allart et al. incl. **Deibert**, “Homogeneous search for helium in the atmosphere of 11 gas giant exoplanets with SPIRou”, 2023, [A&A](#), **677**, 164.
20. Bolin et al. incl. **Deibert**, “Keck, Gemini, and Palomar 200-inch visible photometry of red and very-red Neptunian Trojans”, 2023, [MNRAS Letters](#), **521**, 29.
21. Ridden-Harper et al. incl. **Deibert**, “High-Resolution Transmission Spectroscopy of the Terrestrial Exoplanet GJ 486b”, 2023, [AJ](#), **165**, 170.
22. Sivanandam et al. incl. **Deibert**, “Astrophotonic Solutions for Spectral Cross-Correlation Techniques”, 2022, [SPIE Proceedings](#).
23. Boucher et al. incl. **Deibert**, “Characterizing Exoplanetary Atmospheres at High Resolution with SPIRou: Detection of Water on HD 189733 b”, 2021, [AJ](#), **162**, 223.
24. Jindal, de Mooij, Jayawardhana, **Deibert**, et al., “Characterization of the Atmosphere of Super-Earth 55 Cancri e Using High-resolution Ground-based Spectroscopy”, 2020, [AJ](#), **160**, 101.
25. Petrovich, **Deibert**, & Wu, “Ultra-Short-Period Planets from Secular Chaos”, 2019, [AJ](#), **157**, 180.
26. Huang, Petrovich, & **Deibert**, “Dynamically Hot Super-Earths from Outer Giant Planet Scattering”, 2017, [AJ](#), **153**, 5.
27. Percy & **Deibert**, “Studies of the Long Secondary Periods in Pulsating Red Giants”, 2016, [JAAVSO](#), **44**, 2.

Fellowships & Awards

Banting Postdoctoral Fellowship	2026 – 2028
NSERC	
\$ 140,000	
Chorafas Foundation Prize	2023
Dimitris M. Chorafas Foundation	
\$ 5000	
NSERC Postdoctoral Fellowship	2022 – 2024
NSERC	
\$ 90,000	

Vanier Canada Graduate Scholarship NSERC/University of Toronto <i>\$ 150,000; application ranked #1 in Canada</i>	2019 – 2022
Fieldus Award Department of Astronomy & Astrophysics, University of Toronto <i>\$ 1000</i>	2021 – 2022
Dean's Doctoral Award of Excellence Faculty of Arts & Sciences, University of Toronto <i>\$ 10,000</i>	2020
Alumni Association Scholar (Graduate) University of Toronto <i>\$ 1000</i>	2020
Astronomy & Astrophysics Graduate Program Award University of Toronto <i>\$ 1000</i>	2020
NSERC Canada Graduate Scholarship - Doctoral NSERC/University of Toronto <i>\$ 105,000</i>	2019 – 2022 (Declined)
Faculty of Arts & Sciences Program-Level Fellowship University of Toronto <i>\$ 2300</i>	2018 – 2020
NSERC Canada Graduate Scholarship - Master's NSERC/University of Toronto <i>\$ 17,500</i>	2018 – 2019
U of T Fellowship, Faculty of Arts & Sciences University of Toronto <i>\$ 12,375</i>	2017 – 2018
Ontario Graduate Scholarship OGS/University of Toronto <i>\$ 15,000</i>	2017 – 2018
Faculty of Arts & Sciences Graduate Admissions Fellowship University of Toronto <i>\$ 5000</i>	2017 – 2018
Alumni Association Scholar (Undergraduate) University of Toronto <i>\$ 1000</i>	2017
Highly Commended (Literature) The Undergraduate Awards	2017
Summer Undergraduate Research Fellowship University of Toronto <i>\$ 10,000</i>	2016
Gerald Allen Hollingshead Memorial Scholarship University of Toronto <i>\$ 20,000</i>	2012 – 2016
Summer Undergraduate Research Fellowship Canadian Institute for Theoretical Astrophysics <i>\$ 8000</i>	2015
The Arthur Irwin Prize Victoria College <i>\$ 1000</i>	2014
Dr John Knowles Colling Memorial Scholarship Victoria College <i>\$ 585</i>	2013

Faculty of Arts & Sciences Entrance Scholarship University of Toronto \$ 2000	2013
University of Toronto Scholars Award University of Toronto \$ 5000	2012

Observing Proposals

Principal Investigator	
<i>SPECTRE-GHOST</i> (Co-PI with Adam Langeveld)	2024B – 2027A
GHOST/Gemini South 219 Hours (<i>Large and Long Program</i>)	
<i>Unveiling the Composition of a Rocky Exoplanet Undergoing Catastrophic Evaporation</i>	2026B
GHOST/Gemini South 5.48 Hours	
<i>Chasing a Record-Breaking Accretion Burst in a Free-floating Planetary-mass Object</i>	2025B
GMOS/Gemini South 5.5 Hours (<i>Director's Discretionary Time</i>)	
<i>A Comparative Study of Ultra-Hot Jupiter Dayside Atmospheres</i>	2024A
GHOST/Gemini South 20.8 Hours	
<i>Completing the Picture: Dayside Spectroscopy of an Ultra-Hot Jupiter Atmosphere</i>	2024A
GHOST/Gemini South 5.3 Hours	
<i>High-Resolution Spectroscopy of Hot Exoplanet Atmospheres</i>	2023A
GHOST/Gemini South 3 Hours (<i>System Verification</i>)	
<i>Chemical Gradients & Heat Transport in an Ultra-Hot Jupiter Atmosphere</i>	2022B
MAROON-X/Gemini North 4 Hours (<i>Fast Turnaround</i>)	
<i>Molecular Signatures in the Dayside Emission of an Ultra-Hot World</i>	2022B
SPIRou/CFHT 20 Hours	
<i>Detecting the Magnetic Field of a Hot Jupiter via Spectropolarimetry</i>	2022B
SPIRou/CFHT 12 Hours (<i>Followup to 2020A/2021B Proposals</i>)	
<i>First Detailed Characterization of an Exceptional New Earth-Sized World</i>	2021B
SPIRou/CFHT 2.5 Hours (<i>Ranked #1 of 39 by CanTAC</i>)	
<i>Detecting the Magnetic Field of a Hot Jupiter via Spectropolarimetry</i>	2021B
SPIRou/CFHT 12 Hours (<i>Followup to 2020A Proposal</i>)	
<i>Detecting the Magnetic Field of a Hot Jupiter via Spectropolarimetry</i>	2020A
SPIRou/CFHT 20 Hours (<i>Ranked #1 of 40 by CanTAC</i>)	
<i>Constraining the Ephemerides of a New Young Planetary System</i>	Cycle 1 (2019)
NEOSSat	
<i>Constraining the Carbon Abundance of a Super-Earth Atmosphere</i>	2019A
SPIRou/CFHT 10 Hours	

Co-Investigator	
<i>The Depths of the Inferno</i>	2026B
IGRINS-2/Gemini North	
12.5 Hours	
<i>A Legacy High-Resolution Spectral Library of Ultracool Dwarf Stars</i>	2026B
IGRINS-2/Gemini North	
9 + 11.1 + 26.5 Hours	
<i>Dynamical histories of hot Jupiters around M dwarfs from the Rossiter-McLaughlin effect</i>	2025B
MAROON-X/Gemini North	
16.1 Hours (Followup to 24A/24B/25A Proposals)	
<i>Searching for Spin Braking in Old Hyades Brown Dwarfs</i>	2025B
IGRINS-2/Gemini North	
15.7 Hours	
<i>Constraining the Obliquity of Exoplanet HD 203030 b</i>	2025B
IGRINS-2/Gemini North	
9.5 Hours	
<i>Measuring exoplanetary magnetic fields through their variable circulation</i>	2025B
EXPRES/LDT	
1.5 Nights	
<i>From Day to Night: Probing the Atmosphere of an Ultra-Hot Jupiter Across Changing Orbital Phases</i>	2025B
EXPRES/LDT	
1.5 Nights (Followup to 2025A Proposal)	
<i>Unveiling the Atmosphere and Formation Pathways of Proto-Hot Jupiter HAT-P-2b with IRTF/iSHELL</i>	2025A
IRTF/iSHELL	
1.5 Nights	
<i>The Fates of Planetary Systems: Circumstellar Disks Around White Dwarfs</i>	2025A
DEVENY/LDT	
1.25 Nights	
<i>From Day to Night: Probing the Atmosphere of an Ultra-Hot Jupiter Across Changing Orbital Phases</i>	2025A
EXPRES/LDT	
2 Nights	
<i>Dynamical histories of hot Jupiters around M dwarfs from the Rossiter-McLaughlin effect</i>	2025A
MAROON-X/Gemini North	
11.9 Hours (Followup to 2024A/2024B Proposals)	
<i>Search for an Embedded Planetesimal in the Most Promising White Dwarf Gaseous Disk</i>	2025A
GHOST/Gemini South	
7.5 Hours	
<i>Dynamical histories of hot Jupiters around M dwarfs from the Rossiter-McLaughlin effect</i>	2024B
MAROON-X/Gemini North	
9.5 Hours (Followup to 2024A Proposal)	
<i>Unveiling the Atmosphere of the Highly Irradiated Ultra-Hot Jupiter TOI-2109b</i>	2024A
EXPRES/LDT	
1 Night	

<i>Atmospheric Characterization of the Inflated Hot Jupiter KELT-4 A b</i> EXPRES/LDT 1 Night	2024A
<i>Inferno-Dynamics: Unmasking Chemical Inhomogeneities in the Hottest Exoplanet Atmosphere</i> KPF/Keck 1.5 Nights	2024A
<i>Dynamical histories of hot Jupiters around M dwarfs from the Rossiter-McLaughlin effect</i> MAROON-X/Gemini North 16 Hours	2024A
<i>Detecting the Magnetic Field of a Hot Jupiter via Spectropolarimetry</i> SPIRou/CFHT 24 Hours (<i>Followup to 2020A/2021B/2022B Proposals</i>)	2024A
<i>Diving into the Ultra-Hot Atmosphere of HAT-P-70 b with GHOST</i> GHOST/Gemini South 5.75 Hours (<i>Shared Risk</i>)	2023B
<i>Using GHOST to trace the formation histories of hot Jupiters around M dwarfs</i> GHOST/Gemini South 5.42 Hours (<i>Shared Risk</i>)	2023B
<i>Exploring the Diversity of Exoplanet Atmospheres at High Resolution</i> GRACES/Gemini North & GHOST/Gemini South 224 Hours (<i>Large and Long Program</i>)	2020 – 2026
<i>First Detailed Characterization of an Exceptional New Earth-Sized World</i> IGRINS/Gemini South 2.5 Hours (<i>Director's Discretionary Time</i>)	2021A
<i>Observing CO & CO₂ in Solar System Planets at High Spectral Resolution</i> GIANO/TNG 0.5 Nights	2020A
<i>Characterizing the Atmosphere of the Extremely Hot Jupiter Kepler-13Ab</i> GRACES/Gemini North 10 Hours	2019A
<i>The Chemical Inventory of Exoplanet tau Bootis b</i> SPIRou/CFHT 10 Hours (<i>Ranked #1 of 28 by CanTAC</i>)	2019A
<i>Understanding How Tight Binaries Affect TESS Planets</i> SOAR 4 Nights	2019A

Conference Presentations, Colloquia, & Seminars

1. “Updates from the SPECTRE-GHOST Survey”, Contributed Talk, **High-Resolution Exoplanet and Stellar Characterization Today and in the ELT Era**, Granada, Spain (July 2026).
2. “Diving Deep into Ultra-Hot Jupiter Atmospheres”, Invited Colloquium, **University of Victoria**, Victoria, Canada (April 2026).
3. “From Compositions to Climates: Winds & Weather on Alien Worlds”, Invited Seminar, **University of Victoria**, Victoria, Canada (April 2026).
4. “Winds & Weather on Ultra-Hot Worlds”, Invited Seminar, **University of Waterloo**, Waterloo, Canada (April 2026).
5. “High-Resolution Spectroscopy of Hot Jupiter Atmospheres”, Invited Colloquium, **Pontificia Universidad Católica de Chile**, Santiago, Chile (October 2025).

6. “*Probing Atmospheric Chemistry from High Resolution Spectroscopy*”, Invited Review Talk, **Exo-climes Conference**, Université de Montreal, Montreal, Canada (July 2025).
7. “*Gemini Instruments (Current & Future)*”, Invited Talk, **Korea Gemini Users’ Meeting**, Korea Astronomy & Space Science Institute (KASI), Korea/Virtual (August 2024).
8. “*High-Resolution Spectroscopy of Ultra-Hot Jupiter Atmospheres with GHOST*”, Contributed Talk, **CASCA 2024 Meeting**, University of Toronto/York University, Toronto, Canada (June 2024).
9. “*High-Resolution Spectroscopy of Ultra-Hot Jupiter Atmospheres*”, Invited Colloquium, Lowell Observatory, Flagstaff, Arizona (May 2024).
10. “*GHOST High-Resolution Spectroscopy of Ultra-Hot Jupiter Atmospheres*”, NOIRLab FLASH Talk, Tucson, Arizona (May 2024).
11. “*Future Opportunities for Exoplanet Science at Gemini*”, Invited Talk, **AAS243: Gemini US NGO Splinter Session**, New Orleans, USA (January 2024).
12. “*The Gemini High-Resolution Optical SpecTrograph (GHOST) and Future Instrumentation at the International Gemini Observatory*”, Invited Plenary Talk, **Brazil Astronomical Society Annual Meeting**, Rio de Janeiro, Brazil (October 2023).
13. “*High-Resolution Spectroscopy of Exoplanet Atmospheres with GRACES/Gemini North*”, Contributed Talk, **CASCA 2023 Meeting**, University of British Columbia Okanagan, Penticton, Canada (June 2023).
14. “*Results from the Exoplanets with Gemini Spectroscopy (ExoGems) Survey*”, Contributed Talk, **SOCHIAS Annual Meeting**, Universidad de la Frontera, Temuco, Chile (March 2023).
15. “*Updates on the Gemini High-resolution Optical SpecTrograph (GHOST)*”, Contributed Talk, **SOCHIAS Annual Meeting**, Universidad de la Frontera, Temuco, Chile (March 2023).
16. “*Astrophotonics Solutions for Spectral Cross-Correlation Techniques*”, Contributing Author on Talk by Suresh Sivanandam, **SPIE 12184**, Montreal, Canada (July 2022).
17. “*Results from the ExoGemS Survey*”, Contributing Author on Talk by Laura Flagg, **Exoplanets 4**, Las Vegas/AAS (June 2022). *Proceedings*: Bulletin of the AAS, [54](#), [5](#), [#102.412](#).
18. “*The Extreme Atmosphere of an Exotic World: Detection of Ionized Calcium in WASP-76b*”, Dissertation Talk, **53rd Annual Meeting of the AAS Division for Planetary Sciences (DPS)**, Virtual/AAS (October 2021). *Proceedings*: Bulletin of the AAS, [53](#), [7](#), [#302.04D](#).
19. “*A Near Infrared Chemical Inventory of the Atmosphere of 55 Cancri e*”, Contributed Talk, **Emerging Researchers in Exoplanetary Sciences (ERES) 2021**, Virtual/Princeton University, USA (May 2021).
20. “*A Near Infrared Chemical Inventory of the Atmosphere of 55 Cancri e*”, Invited Seminar, **APEx ExoCoffee**, Max Planck Institute for Astronomy, Heidelberg, Germany (March 2021).
21. “*Remote Sensing of Extreme Worlds: High-Resolution Spectroscopy of Exoplanet Atmospheres*”, Contributing Author on Talk by Ray Jayawardhana, **Extreme Solar Systems IV**, Reykjavik, Iceland (August 2019). *Proceedings*: AAS Extreme Solar Systems, [51](#), [201.01](#).
22. “*High-Resolution Spectroscopy of Exoplanet Atmospheres*”, Contributed Talk, **ERES V**, Cornell University, USA (June 2019).
23. “*High-Resolution Ground-Based Transmission Spectroscopy of Warm Saturns*”, Contributed Talk, **ERES IV**, Penn State University, USA (June 2018).
24. “*High-Resolution Ground-Based Transmission Spectroscopy of Warm Saturns*”, Contributed Talk, **Technologies for ExoPlanetary Sciences (TEPS) 2018**, University of British Columbia, Canada (May 2018).
25. “*High-Resolution Ground-Based Transmission Spectroscopy of Warm Saturns*”, Contributed Talk, **The Canadian Astronomical Society (CASCA) 2018 Meeting**, University of Victoria, Canada (May 2018).

26. “*Detached Ultra-Short Period Planets from Secular Chaos*”, Contributed Talk, **Diversis Mundi: The Solar System in an Exoplanetary Context**, ESO Santiago, Chile (March 2018). *Proceedings*: [10.5281/zenodo.1317487](https://zenodo.org/record/1317487).
27. “*Detached Ultra-Short Period Planets from Secular Chaos*”, Invited Seminar, **Stars & Planets Seminar Series**, Canadian Institute for Theoretical Astrophysics, Toronto, Canada (March 2018).
28. “*Ultra-Short Period Planets*”, Invited Seminar, **Centre for Planetary Sciences Seminar Series**, University of Toronto Scarborough, Canada (March 2018).
29. “*Long Secondary Periods of Pulsating Red Giant Stars*”, Contributed Talk, **Canadian Conference for Undergraduate Women in Physics**, Dalhousie University, Canada (January 2016).

Conference Posters

1. “*Updates from the SPECTRE-GHOST Survey*”, Contributed Poster, **Exoplanets 6**, Porto, Portugal (June 2026).
2. “*Updates from the SPECTRE-GHOST Survey*”, Contributed Poster, **CASCA 2026 Meeting**, University of Montreal, Canada (June 2026).
3. “*CASCA Postdoc Committee Activities 2025 – 2026*”, Contributed Poster, **CASCA 2026 Meeting**, University of Montreal, Canada (June 2026).
4. “*A Near-Infrared Chemical Inventory of the Atmosphere of 55 Cancri e*”, Contributed Poster, **CASCA 2021 Meeting**, Virtual/University of British Columbia, Canada (June 2021).
5. “*A Near-Infrared Chemical Inventory of the Atmosphere of 55 Cancri e*”, Contributed Poster, **Exoplanets III**, Virtual/Heidelberg, Germany (July 2020).
6. “*A Near-Infrared Chemical Inventory of the Atmosphere of 55 Cancri e*”, Contributed Poster, **CASCA 2020 Meeting**, Virtual/York University, Canada (June 2020).
7. “*Near-Infrared Transit Spectroscopy of 55 Cancri e*” Contributed Poster, **Extreme Solar Systems IV**, Reykjavik, Iceland (August 2019). *Proceedings*: AAS Extreme Solar Systems, [51](#), [327.03](#).
8. “*Investigating the Presence of HCN in the Atmosphere of 55 Cancri e*”, Contributed Poster, **Exo-Climes V**, University of Oxford, UK (August 2019).
9. “*Characterizing the Atmosphere of HAT-P-12b with Transmission Spectroscopy*”, Contributed Poster, **Women in Planetary Science and Exploration**, University of Toronto, Canada (March 2018).
10. “*Dynamically Hot Super-Earths from Outer Giant Planet Scattering*”, Contributed Poster, **Canadian Conference for Undergraduate Women in Physics**, McMaster University, Canada (January 2017).
11. “*Investigating Long Secondary Periods of Pulsating Red Giant Stars*”, Contributed Poster, **Department of Physics Undergraduate Research Fair**, University of Toronto, Canada (April 2016).

Workshop Attendance

ComSciConCAN: Science Communication Workshop
McMaster University, Canada

Summer 2019

Multi-Dimensional Characterization of Distant Worlds
University of Michigan, Ann Arbor

Fall 2018

Additional Research Experience

Graduate Research Experience

Graduate Research Course	Summer 2018
University of Toronto	
Advisor: Diana Valencia	
<i>Modelling tidal dissipation in super-Earth interiors.</i>	
Graduate Research Course	2017 – 2018
University of Toronto	
Advisor: Ray Jayawardhana	
<i>High-resolution optical spectroscopy of warm Saturn atmospheres.</i>	

Undergraduate Research Experience

Undergraduate Research Assistant	Summer 2017
Canadian Institute for Theoretical Astrophysics	
Advisor: Cristobal Petrovich	
<i>Simulating the origins and dynamics of ultra-short period planets.</i>	
Undergraduate Research Thesis	2016 – 2017
University of Toronto	
Advisor: Chris Matzner	
<i>Observing starforming regions in the Dragonfish Nebula.</i>	
Undergraduate Research Assistant	Summer 2016
Dunlap Institute for Astronomy & Astrophysics	
Advisors: Chelsea Huang & Cristobal Petrovich	
<i>Simulating the dynamics of Kepler super-Earths with outer giant planets.</i>	
Undergraduate Research Assistant	2015 – 2016
University of Toronto	
Advisor: John Percy	
<i>Studying the long secondary periods of pulsating red giant stars.</i>	
Undergraduate Research Assistant	Summer 2015
University of Toronto	
Advisors: Marten van Kerkwijk & Ue-Li Pen	
<i>Observing and studying giant pulses and scintillation from the Crab pulsar.</i>	

Teaching Experience

Head Teaching Assistant	Winter 2019
AST201: Stars and Galaxies (U of T)	
<i>Head TA for a team of 30+ TAs</i>	
Head Teaching Assistant	Fall 2018
AST101: The Sun and its Neighbours (U of T)	
<i>Head TA for a team of 30+ TAs</i>	
Teaching Assistant	Fall 2021
AST101: The Sun and its Neighbours (U of T)	Summer 2020
	Fall 2019
	Fall 2017
Teaching Assistant	Winter 2020
AST201: Stars and Galaxies (U of T)	Summer 2019
	Winter 2018
	Winter 2017
	Winter 2016

Teaching Assistant AST301: Observational Astronomy (U of T)	Fall 2020
Course Development Support AST301: Observational Astronomy (U of T) <i>Hired to redesign course content for online format during COVID-19</i>	Summer 2020
Teaching Assistant AST251: Life on Other Worlds (U of T)	Summer 2018 Winter 2018
Teaching Assistant ASTC25: Astrophysics of Planetary Systems (U of T Scarborough)	Winter 2018

Relevant Work Experience

Science Communications Associate Research2Reality	2018 – Present
Public Outreach Support Dunlap Institute for Astronomy & Astrophysics	2021 – 2022
Astronomy Library Assistant University of Toronto	2017

Service Work

CASCA Postdoc Committee Chair Canadian Astronomical Society (CASCA)	2025 – Present
Referee A&A	2025 – Present
SOC/LOC Co-Chair Solar System in Context Conference	2025
Scientific Organizing Committee CASCA 2025	2024 – 2025
TAC Member NOIRLab Time Allocation Committee	2023 – Present
Referee AAS Journals	2023 – Present
CASCA Postdoc Committee Member Canadian Astronomical Society (CASCA)	2023 – 2025
Science Fellow Search Committee NOIRLab/International Gemini Observatory	2023 – 2024
Referee Canadian Time Allocation Committee (CanTAC)	2022 – Present
President Graduate Astronomy Students Association, University of Toronto	2019 – 2020
Director Search Committee Member Dunlap Institute for Astronomy & Astrophysics	2020
<i>Elemental</i> Mental Health Magazine Executive Editor Grad Minds, University of Toronto	2019 – 2020
Department Chair Search Committee Member Department of Astronomy & Astrophysics, University of Toronto	2019 – 2020
Science Discussion Group Facilitator Department of Astronomy & Astrophysics, University of Toronto	2018 – 2019
CASCA Student Representative Canadian Astronomical Society	2018 – 2019

Mental Health Committee Member Department of Astronomy & Astrophysics, University of Toronto	2017 – 2019
Astronomy Undergraduates Liaison Graduate Astronomy Students Association	2017 – 2019
Astronomy Undergraduates Union (AU) Co-Founder University of Toronto	2017

Outreach

Public Lectures, Panels, Workshops, & Presentations

Workshop on Science Writing Canadian Association of Physicists	June 2022
Planet Gazing Party Host Dunlap Institute for Astronomy & Astrophysics	September 2021
Panel Discussion on Creating a CV U of T Summer Undergraduate Research Program	Summer 2021
Public Talk: The Extraordinary Worlds of Exoplanets Richmond Hill Public Library	February 2021
Planet Gazing Party Panelist Dunlap Institute for Astronomy & Astrophysics	September 2020
Public Talk: Astronomy Night David Dunlap Observatory/RASC Toronto Centre	July 2020
Astro at Home Talk: Extraordinary Exoplanets Discover the Universe	April 2020
Panel Discussion on Astronomy Toronto Astronomy & Space Exploration Society	November 2019
Astronomy on Tap: An Astronomer's Guide to Finding Exoplanets Astronomy on Tap Toronto	June 2019
Lecturer for Discover the Universe Teacher's Workshop Discover the Universe	April 2019
Panel Discussion on Graduate School Astronomy Undergraduates Union	January 2019
NSERC Scholarship Application Workshop University of Toronto	November 2018
Public Talk: A New Window on Exoplanet Atmospheres Graduate Speaker Series, University of Toronto	April 2018
Public Talk for the Canadian Space Society January Meeting Canadian Space Society	January 2018

Mentorship

Postdoc Peer Mentor Mentor to new postdoctoral fellow.	2024 – Present
Graduate-Undergraduate Mentor Mentor to undergraduate student.	2020 – 2021
Girls SySTEM Women in STEM Mentor Mentor to high school student.	2019 – 2020
Graduate Peer Mentor Mentor to incoming graduate students.	2018 – 2020

Other Outreach Work

ComSciConGTA Conference Organizing Committee	2019 – 2020
Communicating Science Conference (ComSciCon) Series	
SpaceTime Event Volunteer	2019 – 2020
Dunlap Institute for Astronomy & Astrophysics	
“Ask an Astronomer” Email Account Manager	2018 – 2020
University of Toronto	
“Science Around Town” Weekly Columnist	2018 – 2019
<i>The Varsity</i> Newspaper, University of Toronto	
Staff Science Writer	2017 – 2020
<i>The Varsity</i> Newspaper, University of Toronto	
Solar Eclipse Event Volunteer	2017
Canadian National Exhibition	
Telescope Coordinator & Event Volunteer	2017
Toronto Chinatown Festival	
Astronomy on Tap Volunteer	2015 – 2022
Astronomy on Tap Toronto	
AstroTours Volunteer	2015 – 2022
University of Toronto	

Professional Development

Advanced Undergraduate Teaching Certification	2018 – 2020
Teaching Assistant Training Program, University of Toronto	
SafeTALK Suicide Awareness & Intervention Training	2019
University of Toronto/Living Works	
Teaching Fundamentals Certification	2017 – 2018
Teaching Assistant Training Program, University of Toronto	

Select Media Appearances

1. *“GHOST Spies Ultra-hot Jupiter With Ultra-fast Winds”*, NOIRLab Blog, May 2025.
2. *“Galaxies and Goals: Dual Passions of Astronomer Turned Author Emily Deibert”*, University of Toronto Arts & Sciences News, August 2024.
3. *“Researchers investigate an ‘ultra-hot Jupiter’ with iron rain and calcium wind”*, Quirks & Quarks, CBC Radio, October 2021.
4. *“Bizarre, scorching exoplanet WASP-76 b may be even hotter than we thought”*, SPACE.com, October 2021.
5. *“Inferno-like WASP-76b exoplanet where iron gets vaporized and falls from the sky like rain is even HOTTER than first thought, study finds”*, The Daily Mail, October 2021.
6. *“This exoplanet rains iron. And scientists say temperatures can hit a scorching 4,000 degrees”*, USA Today, October 2021.
7. *“Planet with iron rainfall is even more extreme than scientists thought”*, CNN, October 2021.
8. *“Quirks & Quarks Listeners’ Questions Episode”*, Quirks & Quarks, CBC Radio, June 2021.
9. *“Astronomy PhD student Emily Deibert awarded A&S Doctoral Excellence Scholarship”*, U of T News, November 2020.
10. *“Wander the Night Sky”*, CIBC Private Wealth Newsletter, August 2020.
11. *“A Faraway Solar System Looks Eerily Similar to Our Own”*, The Atlantic, July 2020.
12. *“Catching Up With ‘Award of Excellence’ Winner Emily Deibert”*, Dunlap Institute for Astronomy & Astrophysics, April 2020.

13. *"Astronomy PhD Student Named a 2019 Vanier Scholar for Research on Exoplanets"*, The Varsity, University of Toronto, October 2019.
14. *"Meteor Sighting Lights up Night Sky"*, The Manitoulin Expositor, December 2018.
15. *"Solar Telescopes and Solar Eclipse Viewing"*, CTV News Broadcast Interview, August 2017.
16. *"Solar Eclipse Glasses and Safety"*, CTV News Broadcast Interview, August 2017.
17. *"Starfinders: The Campaign for U of T Astronomy"*, Dunlap Institute for Astronomy & Astrophysics, February 2017.

Press Releases

1. *"Spectrum reveals extreme exoplanet is even more exotic"*, Dunlap Institute for Astronomy & Astrophysics, University of Toronto, October 2021.
2. *"Spectrum reveals extreme exoplanet is even more exotic"*, Cornell Chronicle, Cornell University, October 2021.
3. *"Scientists reveal extreme exoplanet is even more exotic than they thought"*, Queen's University Belfast, October 2021.

Select Science Writing

200+ science news articles written for a range of media outlets. Full portfolio available [online](#).

1. *"How Many Moons Do You Think Saturn Has?"*, Research2Reality, May 2025.
2. *"How Much Stuff is There in the Universe?"*, New Scientist, August 2020.
3. *"Was the Milky Way a Quasar?"*, PBS Space Time, April 2020.
4. *"Astronomers Now Have Some Idea of How the First Stars Died"*, Massive Science, June 2019.
